

SANODAL

RANGE OF GOLDEN SHADES

The Sanodal adsorptive colouring process locks the golden dye securely in the pores of the anodised layer.

The final sealing process provides the coloured pigments with lasting protection against weathering influences. Sanodal-anodised aluminium components retain their shiny appearance for decades.

ADVANTAGES

- 100% UV-resistant and non-fading
- Highly durable
- Weatherproof and low-maintenance
- 100% recyclable and non-toxic

APPLICATIONS

Sanodal can be applied to all aluminium components that are labelled as being suitable for decorative anodising.

- Extruded aluminium profiles
- Aluminium sheets and plates
- Aluminium expanded metal

Maximum component size: 7500 x 1200 x 2200 mm
